

GL Multicurrency Consolidations

for Microsoft Dynamics GP

Consolidate financial statements of foreign subsidiaries using U.S. generally accepted accounting principles (GAAP) into your reporting currency.

Features:

- Ideal for multinational corporations that need to consolidate companies with different functional currencies.
- Translate all foreign company currencies into your Functional/Reporting currency for consolidation purposes.
- Eliminate the need to do DAX currency translations in FRx.
- Consolidate foreign currency companies according to FAS 52 (Financial Accounting Standards 52).
- Supports both current and temporal translation rate methods.
